Subject: Questions About Flooded Stored Manure Pioneer Hwy Silvana WA

Good afternoon Mr. Fledge,

If by chance you are not the correct person, please forward this email to the responsible individual.

I am curious about the "exported" manure shown below and the investigation which was performed. Initially it was entered in ERTs on Oct 6th 2021 and investigated in mid January 2022

This is what I would like to know:

Was it dairy? If I am not mistaken, it is the solids from the dairy farm near the bridge and the old church on the hill.

And, if so, it was a dairy, who operated and owned the trucks to dump of the manure and who (owner of equipment) spread the manure earlier this month?

Was there a charge for this material when it was "exported"?

Please advise me know if you need to further investigate this information to obtain owner / operator information /charges if the source was the dairy. Perhaps your inspector will need to investigate the vehicle(s) driving / operator logs.

Looking forward to your both kind and timely response, in Stanwood, I am
